

Skegby Family Medical Centre **Electronic Prescription Service (EPS)**

At Skegby Family Medical Centre we operate using EPS (Electronic Prescription Service).

All prescriptions will be sent electronically from the practice to your nominated Pharmacy.

This process is designed to be easier for the patient as they are no longer required to pick up their prescription from the practice. Instead, the patient is only required to attend their nominated pharmacy where their prescription will have been received and their medication organised ready for collection.

It helps the practice in reducing our carbon footprint as we will be using and wasting less paper by sending the prescriptions electronically.

Sending electronically is also safer as it reduces the chances of lost and stolen prescriptions.

Please nominate a pharmacy to receive your prescriptions:

Name: _____

Signed: _____

Date: _____
